Natural Comfort

SLEEPING IN NATURAL COMFORT

Odeja Natur is a collection of quilts, pillows and uppermattresses, made from wonderful certified natural materials, soft organic shapes and well thought-out details. When designing the products, we followed the magical perfection of nature and sewn our respect of your well-being into every one of them. Every Odeja Natur product is therefore something special and all of them are designed to provide incredibly calm and comfortable sleep.

Soft Embrace

ELEGANT AND ECO-CONSCIOUS LIVING

Our Odeja Natur Collection is a testament to the beauty of nature's simplicity. Crafted with a deep respect for the environment and a commitment to comfort, this bedding is made from carefully selected natural materials. From sumptuously soft organic cotton to luxurious different wools, each piece is a harmonious blend of earthy textures and soothing colors. The Odeja Natur Collection brings the calming essence of the natural world into the home, enveloping you in warmth and serenity, making it the perfect choice for those who seek both elegance and eco-conscious living.

BENEFITS OF PLANT-BASED NATURAL MATERIALS

Bamboo fibres are hypoallergenic, antimicrobial and hydrophilic, amazingly skin friendly and airy. They do not retain dust mites. The sleeping climate created by bamboo fibres is pleasantly fresh and is recommended to everyone who often feels hot at night.

Buckwheat hulls wonderfully fit a body, create pleasant warmth and stimulate blood circulation with a gentle micro massage. They do not retain moisture, are antimicrobial and repel allergenic organisms and thus effectively contribute to healthy sleep.

Cotton is skin friendly, airy and light. It very effectively drains body moisture into the room. It creates a pleasantly airy and fresh sleeping climate, which is appreciated by everyone who is prone to night perspiration.

Corn fiber is a type of natural fiber that is derived from corn, specifically the corn plant's leaves, stalks, and husks. Corn fibers are soft and comfortable and feel similar to cotton. It is breathable, allowing air to circulate freely through the fabric and helping to regulate body temperature.

Flax is antistatic and hypoallergenic, it effectively drains moisture into the room and enables the skin to breathe. With its porous structure it contributes to airiness and creates a fresh sleeping microclimate.

Hemp has excellent properties of its fibres, which are light, airy and hypoallergenic. Hemp fiber is highly absorbent, able to absorb up to 20% of its weight in moisture without feeling damp. It has natural antibacterial properties, making it resistant to mold, mildew, and other types of bacteria.

Lavender scent improves the quality of sleep: it helps you fall asleep faster and promotes deeper sleep at any age. The scent of lavender petals also has very relaxing properties that help reduce stress, and anxiety, while also being pleasantly calming.

Pine tree shavings, which with their beneficial properties ensure deep and peaceful sleep, ease breathing, contribute to faster body regeneration, reduce stress levels, regulate the nervous system and calm the heart rate.

Kapok fibre is natural cellulosic fibre which grows on the kapok tree. Due to its similarity to cotton is also called silk cotton or jawa cotton. Kapok is natural hypoallergenic and does not attract dust and mites. The kapok fibres are 8 times lighter than cotton by volume and offer extremely silky softness.

Latex is incredibly elastic and durable. It immediately adapts to the body of the user and nevertheless permanently retains its original shape and flexibility. Due to its adaptability, airiness and antibacterial characteristics, it enables a complete regeneration of the body.

TENCEL™ Lyocell fibers enable the skin to breathe. This fiber is a type of sustainable and eco-friendly fiber that is made from wood pulp. It is known for its softness, durability, and versatility. It has a silky smooth texture that is incredibly soft and comfortable to the touch. It is also highly absorbent and moisture-wicking, which means it can easily absorb and release moisture.

BENEFITS OF ANIMAL-BASED NATURAL MATERIALS

Alpaca wool is hypoallergenic and has a natural luster, which gives it a luxurious appearance. Alpaca wool is warmer than sheep's wool, making it ideal for use in colder months of the year. What makes alpaca wool so distinguished are its hollow fibers, which help to regulate body temperature during sleep, also they are almost completely waterproof, help prevent night sweats.

Sheep wool creates a fairy-tale comfort: it generates just the right level of warmth depending on the room and body temperature, has an amazing ability to accumulate warmth and is excellent at draining moisture.

Camel wool is one of the most prestigious fibres and creates a dreamy comfort: it is airy, does not retain moisture, does not generate static electricity and does not irritate skin. Its most prominent features are high flexibility and insulation, which make it suitable for all seasons. It creates just the right level of warmth and evenly distributes it all over the body.

Cashmere wool is a luxurious and highly prized fiber that is renowned for its incredible softness, warmth, and durability. Cashmere is much more insulating than ordinary sheep's wool and provides superior insulation.

Down and feathers are airy and gentle as a cloud. Down is wonderfully light and soft and feathers generate support and stability. They quickly create and retain warmth and evenly distribute it all over the body. They are washed and disinfected before being used in the product and therefore do not contain dust mites.

Tussah silk is highly breathable, which means it can help regulate body temperature and keep you comfortable in a wide range of temperatures. It has natural moisture-wicking properties, which can help keep you cool and dry in humid or sweaty conditions. Tussah silk is naturally hypoallergenic, making it a great choice for people with sensitive skin.

Pillows

BUCKWHEAT BIO PILLOW

Prestigious pillow,
filled with buckwheat hulls

 With additional pillowcase

COMPOSITION:

Fabric of washable cover:
100 % cotton, percale

Fabric of inner pillow:
100 % cotton

Filling of inner pillow:
100 % heat treated sorted buckwheat hulls

CHARACTERISTICS:

- cotton is soft to the touch and very kind to the skin and suitable for those with sensitive skin;
- buckwheat hulls are firm and supportive and they make pillow to conform to the shape of the head and neck to provide personalized support;
- buckwheat hulls are moisture-wicking, they are able to absorb sweat and moisture to keep the pillow dry and comfortable;
- buckwheat hulls are pleasantly cooling and ensure blood circulation and relaxing sleep.

BUCKWHEAT LUX MEDIUM PILLOW

Compact anatomical pillow made
of sheep wool and buckwheat hulls

 With removable cover

COMPOSITION:

Fabric of quilted cover:
100 % cotton

Filling of quilted cover:
100 % heat treated sorted buckwheat hulls

Fabric of inner pillow:
100 % cotton

Filling of inner pillow:
100 % wool balls

CHARACTERISTICS:

- the airy and flexible buckwheat hulls in the quilting of the cover gently massage your head and neck, stimulating blood circulation and soothing with their pleasant sound;
- premium wool creates fabulous comfort. The pillow offers healthy support and gentle warmth;
- the pillow has buckwheat hulls only in the quilting of one side of the cover, so you can turn it over to the other side if you want to enjoy only the comfort of the wool and its wonderful properties;
- the pillow insert has a zipper for removing or adding filling - thus allowing you to adjust the height of the pillow.

BAMBOO EXTRA SOFT PILLOW

A very soft pillow,
made with bamboo fibres

COMPOSITION:

Fabric:

45 % viscose (bamboo), 55 % cotton

Filling:

100 % polyester, siliconized

CHARACTERISTICS:

- bamboo fibers have very special properties: they are hypoallergenic, skin-friendly and highly breathable;
- bamboo fibers do not overheat the body, as they have hydrophilic properties and efficiently wick away body moisture;
- the filling of the pillow creates an elastic softness that provides healthy support for the neck and head thus ensures long-lasting comfort;
- the pillow enables pleasant relaxation in a light sleeping climate without night sweats.

COTTONEL SOFT PILLOW

A soft cotton pillow
for gentle relaxation

COMPOSITION:

Fabric of washable quilted cover:

100 % cotton

Filling of washable quilted cover:

100 % cotton (150 g/m²)

Fabric of inner pillow:

100 % cotton

Filling of inner pillow:

100 % siliconized polyester balls

CHARACTERISTICS:

- cotton absorbs moisture well and naturally regulates temperature, it is airy and breathable;
- the pillow is ideal for anyone with sensitive skin or prone to night sweats;
- the zipper in the quilted cover contributes to the high usability of the pillow: it can be taken off and washed separately. At the same time, it allows to adjust the height and softness of the pillow by removing or adding filling in the core.

With removable
washable cover

TENCEL KAPOK SOFT PILLOW

A soft pillow made of soft TENCEL™ fabric and kapok filling

 With removable washable cover

COMPOSITION:

Fabric of washable quilted cover:
100 % TENCEL™ Lyocell fibres, satin

Filling of washable quilted cover:
90 % TENCEL™ Lyocell fibres, 10 % kapok

Fabric of inner pillow:
100 % cotton

Filling of inner pillow:
100 % kapok

CHARACTERISTICS:

- TENCEL™ creates incredible softness and supreme comfort on the skin;
- with its softness, the kapok filling ensures exceptional comfort during sleep;
- suitable for all sleeping positions;
- the materials of the pillow successfully wick body moisture into the room and thus prevent overheating of the head and neck;
- the pillow is recommended for people who like to sleep on lower pillows.

TENCEL SILK SOFT PILLOW

A soft pillow made of soft TENCEL™ fabric and tussah silk filling

 With removable washable cover

COMPOSITION:

Fabric of washable quilted cover:
100 % TENCEL™ Lyocell fibres, satin

Filling of washable quilted cover:
100 % tussah silk (150 g/m²)

Fabric of inner pillow:
100 % organic cotton

Filling of inner pillow:
100 % organic cotton, shredded

CHARACTERISTICS:

- the silky soft TENCEL™ fibre in the fabric is harvested from natural cellulose;
- Its fibre structure offers a unique combination of properties of natural and man-made fibres: TENCEL™ is as soft as silk, as strong as polyester and as moisture absorbent as cotton;
- the silk in the filling provides exceptional comfort during sleep and is extremely breathable and moisture-wicking, which helps especially with excessive night sweats;
- it is also hypoallergenic and suitable for people with sensitive skin;
- the pillow is recommended for people who like to sleep on lower pillows.

LINEN SOFT PILLOW

A soft linen pillow
for dreamy comfort

 With removable
washable cover

COMPOSITION:

Fabric of washable quilted cover:
100 % cotton, percale

Filling of washable quilted cover:
60 % linen, 40 % cotton (150 g/m²)

Fabric of inner pillow:
100 % cotton

Filling of inner pillow:
100 % cotton, shredded

CHARACTERISTICS:

- cotton absorbs moisture well and naturally regulates temperature, it is airy and breathable;
- the linen in the filling of the pillow allows more air-flow, making it suitable for hot summer nights;
- flax has antiseptic and antibacterial properties, so it is also suitable for more sensitive users;
- the zipper in the quilted cover contributes to the high usability of the pillow: it can be taken off and washed separately. At the same time, it allows to adjust the height and softness of the pillow by removing or adding filling in the core.

BIOACTIV MEDIUM PILLOW

Medium soft pillow,
filled with hemp and corn

 With removable
washable cover

COMPOSITION:

Fabric of washable quilted cover:
100 % cotton

Filling of washable quilted cover:
50 % corn, 50 % hemp

Fabric of inner pillow:
100 % cotton

Filling of inner pillow:
50 % corn, 50 % hemp, shredded

CHARACTERISTICS:

- hemp fibres are excellent moisture absorbers, breathable and prevent excessive sweating;
- corn fibres are known for their softness and effective heat regulation;
- the carefully selected filling is complemented by a cosy cotton fabric that is extremely skin-friendly, highly hydrophilic, breathable and lightweight;
- the quilted cover has a zipper so it can be easily removed and washed separately;
- the zipper is also sewn into the pillow insert, allowing you to adjust its height.

KAPOK MEDIUM PILLOW

Silky soft medium pillow,
filled with silk cotton - kapok

 With removable
washable cover

COMPOSITION:

Fabric of washable quilted cover:
100 % cotton, percale

Filling of washable quilted cover:
70 % cotton, 30 % kapok (100 g/m²)

Fabric of inner pillow:
100 % cotton

Filling of inner pillow:
100 % kapok

CHARACTERISTICS:

- the filling of the pillow contains kapok, also known as silk cotton. Kapok refers to a magnificent tropical tree and its seed fibre whose main feature is exceptional lightness;
- the fabric of the pillow and one part of the filling is cotton, which is indispensable for anyone who likes to sleep in natural sleeping environment;
- the pillow is also enriched with zipper which enables you to take out some of the filling and thus adjust the height of the pillow to your wishes.

LAVANDA MEDIUM PILLOW

Medium soft lavender scented pillow,
filled with 100 % cotton

 With removable cover

COMPOSITION:

Fabric of washable quilted cover:
100 % cotton, satin

Filling of washable quilted cover:
100 % cotton (150 g/m²)
lavender petals

Fabric of inner pillow:
100 % cotton

Filling of inner pillow:
100 % cotton, shredded

CHARACTERISTICS:

- the scent of lavender improves the quality of sleep: it helps you fall asleep faster and promotes deeper sleep;
- cotton creates a pleasantly airy and fresh sleeping climate, which is appreciated by everyone who is prone to night perspiration;
- the pillow is also enriched with zipper which enables you to take out some of the filling and thus adjust the height of the pillow to your wishes.

PINIA MEDIUM PILLOW

Medium soft pine scented pillow,
filled with 100 % sheep wool

 With removable cover

COMPOSITION:

Fabric of quilted cover:
100 % cotton

Filling of quilted cover:
100 % sheep wool (150 g/m²)
pine shavings

Fabric of inner pillow:
100 % cotton

Filling of inner pillow:
100 % wool balls

CHARACTERISTICS:

- pine shavings in the filling of the quilted cover give off an aromatic scent, which is extremely pleasant and soothing;
- cotton fabric is characterized by high hydrophilicity, lightness, and breathability;
- sheep wool creates fabulous comfort;
- the pillow is also enriched with zipper which enables you to take out some of the filling and thus adjust the height of the pillow to your wishes.

MERINOFIL MEDIUM PILLOW

Prestigious medium soft pillow,
filled with sheep wool

 With removable
washable cover

COMPOSITION:

Fabric of washable quilted cover:
100 % cotton, percale

Filling of washable quilted cover:
100 % washable sheep wool

Fabric of inner pillow:
100 % propylene

Filling of inner pillow:
100 % wool balls

CHARACTERISTICS:

- the pillow offers a healthy support and gentle warmth, and at the same time, due to high airiness and hydrophilicity does not cause night perspiration;
- the possibility of washing the removable quilted cover and self-cleaning abilities of sheep wool ensure that the pillow preserves its freshness;
- the zipper in the quilted cover enables you to adjust its height and softness according to your wishes.

LATEX TRIS COMPACT PILLOW

Anatomical pillow with
high-quality latex core

 With removable
washable cover

COMPOSITION:

Fabric:
80 % cotton, 20 % polyester

Core:
100 % latex, in 3 layers

CHARACTERISTICS:

- latex is characterised by its extraordinary softness and elasticity, with a long service life;
- thanks to both its premium latex and its shape, the pillow adapts perfectly to your head and ensures a stable and relaxed body position while you sleep;
- it is made of three layers of latex, which you can adjust to your preference. If you wish, you can remove the layers from the cover to reduce the height of the pillow;
- latex is highly breathable and does not retain heat, so it contributes to a fresh and healthy sleeping climate.

DOWN SOFT PILLOW

Soft pillow, filled with new down, feathers and flax

3 chamber pillow

DOWNFIL SOFT PILLOW

Prestigious soft pillow, filled with new goose down

3 chamber pillow

COMPOSITION:

Fabric:

100 % cotton, percale

Filling of outer 3-layer core wrap:

75 % new down and feathers, 25 % flax

Core filling:

100 % new feathers

CHARACTERISTICS:

- the down and feathers are delightfully airy and light. They create a pleasantly warm sleeping climate without causing night sweats;
- thanks to the natural elasticity and softness of the down and feathers and the special three-layer core composition, the pillow adapts beautifully to the head and allows the body to relax completely while sleeping;
- the firmer core offers good neck support;
- the linen in the pillow filling is extremely hydrophilic and anti-static.

COMPOSITION:

Fabric:

100 % cotton, batiste

Filling of outer 3-layer core:

90 % new goose down, 10 % new goose feathers

Core filling:

85 % new goose feathers, 15 % new goose down

CHARACTERISTICS:

- selected goose down and feathers and a sophisticated pillow composition create divine comfort;
- the new goose down and feathers are characterised by their exceptional softness, natural elasticity, excellent moisture wicking, breathability and ability to regulate temperature;
- the pillow has a special core that is surrounded on both sides by a softer and more breathable layer;
- the firmer core offers good neck support;
- the ingenious structure creates the right height for the pillow and ensures that its shape is maintained.

LINEN LUX EXTRA LIGHT QUILT

Luxurious light summer quilt
made of cotton and linen

COMPOSITION:

Fabric:
100 % cotton

Filling:
60 % linen, 40 % cotton (150 g/m²)

CHARACTERISTICS:

- the linen in the filling of the quilt allows more air-flow, making it suitable for hot summer nights;
- flax has antiseptic and antibacterial properties, so it is also suitable for more sensitive users;
- quilt it is very breathable and prevents excessive sweating during sleep;
- we recommend this quilt for summer nights or very warm bedrooms as well as for those who are prone to night sweats.

COTTONEL EXTRA LIGHT QUILT

Very light quilt,
made of 100 % cotton

COMPOSITION:

Fabric:

CHARACTERISTICS:

- alpaca wool has always been popular for its pleasant softness;
- alpaca wool is also 30% warmer than sheep wool. As well as being extremely soft and light, it is also very sturdy;
- quilt filled with alpaca wool combined with cotton fabric is the perfect choice for those who appreciate a comfortable and natural sleeping environment.

CAMEL MEDIUM QUILT

Luxurious medium warm quilt
filled with camel wool

COMPOSITION:

Fabric:

100 % cotton, percale

Filling:

100 % camel wool (400 g/m²)

CHARACTERISTICS:

- camel wool is renowned for its extraordinary ability to regulate and accumulate heat;
- a sophisticated combination of prestigious camel wool and premium cotton fabric creates a royal comfort;
- the quilt is wonderfully warm, pleasantly soft and supple, and will allow you to regenerate and relax in a dreamlike way;
- we recommend it to anyone who wants to enjoy a dreamy sleeping climate.

DOWN EXTRA QUILT

Very warm down quilt

COMPOSITION:

Fabric:

100 % cotton, percale

Filling:

75 % new down,
25 % linen (265 g/m²)

CHARACTERISTICS:

- the new down and feathers are thrillingly airy and light and create a dreamy comfort;
- the high quality combination of natural materials enables the quilt to extremely effectively accumulate and preserve warmth without causing perspiration;
- the flax in the filling is antistatic and antibacterial; it effectively drains body moisture into the room and enables your skin to breathe. It complements the thermal characteristics of down and feathers.

DOWNFIL EXTRA QUILT

Prestigious down quilt

COMPOSITION:

Fabric:

100 % cotton, batiste

Filling:

90 % goose down, 10 % goose feathers (240 g/m²)

CHARACTERISTICS:

- the prestigious goose down in a high-quality cotton fabric creates a fairy-tale light and pleasant embrace for everyone who enjoys pampering;
- the quilt quickly creates wonderful warmth, which is then evenly distributed all over the body and thus enables you complete body regeneration during sleep;
- the quilt is suitable for everyone who is often cold, who like to sleep in colder bedrooms or have problems with rheumatism.

Weighted quilts

Weighted quilts are filled with glass beads and designed to provide gentle pressure evenly distributed across the body. They have evolved from niche therapeutic tools to mainstream products that offer numerous benefits for individuals seeking improved sleep, relaxation, and mental well-being.

BENEFITS OF WEIGHTED QUILTS

Enhanced Sleep Quality

The evenly distributed weight creates a sensation known as Deep Touch Pressure (DTP), which can have a calming effect on the nervous system. This helps the body release serotonin, which is then converted into melatonin, the hormone responsible for regulating sleep. As a result, individuals using weighted quilts often experience a more restful and uninterrupted night's sleep.

Anxiety and Stress Reduction

The deep pressure provided by the quilt can stimulate the release of neurotransmitters like serotonin and dopamine, which are associated with mood regulation and feelings of relaxation. This can lead to reduced anxiety and stress levels, making weighted quilts a valuable tool for managing daily life pressures.

Pain Relief and Improved Circulation

Weighted quilts can also be beneficial for those dealing with chronic pain conditions, such as fibromyalgia and arthritis. The gentle pressure can stimulate blood flow and help relax tense muscles, potentially reducing discomfort and improving overall well-being. Additionally, the release of endorphins triggered by the weighted quilt may provide natural pain relief.

Better Mental Health

When the body is enveloped by a weighted quilt, it can trigger the release of oxytocin, a hormone associated with bonding and emotional well-being. This can lead to an increased sense of security, comfort, and emotional regulation. People suffering from conditions like depression or post-traumatic stress disorder may find solace in the embrace of a weighted quilt.

Improved Focus and Attention

For individuals seeking enhanced focus and attention during tasks, weighted quilts can be a valuable aid. The soothing pressure can help reduce restlessness and fidgeting, allowing for improved concentration and productivity.

PERLA COTTON MEDIUM QUILT

Medium warm weighted quilt
filled with cotton and glass beads

COMPOSITION:

Fabric:
100 % cotton

Filling:
100 % cotton (300 g/m²)
glass beads (total weight of quilt is 4 or 7 kg)

CHARACTERISTICS:

- cotton is soft to the touch and very kind to the skin;
- quilt is suitable for those with sensitive skin;
- breathable, light and efficiently wicks body moisture into the room;
- the gentle pressure created by the weighted quilt increases release of calming hormones and promotes healthies and calmer sleep;
- **RECOMMENDATION: weighted quilt should weight less then 1/10 of a weight of a person who is using it.**

- kapok fibres are up to 8 times lighter than cotton and offer exceptional silky softness and do not attract dust and dust mites;
- quilt is indispensable for those who like to sleep in a very natural, fresh and gentle sleeping climate;
- the gentle pressure created by the weighted quilt increases release of calming hormones and promotes healthies and calmer sleep;
- **RECOMMENDATION: weighted quilt should weight less then 1/10 of a weight of a person who is using it.**

Mattress cover

NATUR DOUBLE COMFORT UPPER MATTRESS

Winter-summer comfort topper

 With elastic band

COMPOSITION:

Fabric - summer side:
100 % cotton

Filling - summer side:
100 % cotton (300 g/m²)

Fabric - winter side:
75 % cotton, 25 % polyester, terrycloth

Filling - winter side:
100 % washable sheep wool (450 g/m²)

CHARACTERISTICS:

- the thickness of the topper will amaze you with its comfort, and the composition will enthuse you with its exceptional functionality;
- the sheep wool and cotton in the topper are distinguished by their hydrophilic ability and effective temperature regulation;
- the topper has two sides; one side has the cotton filling which is ideal for warm seasons, the filling of high-quality sheep wool on the other side is excellent for colder nights;
- the mattress cover's clever composition prevents the body from overheating and therefore allows for a perfect night's rest without night sweats.

NATUR PROTECT UPPER MATTRESS

Protective mattress cover
with cotton filling

 With elastic band

COMPOSITION:

Fabric:
100 % cotton

Filling:
100 % cotton (300 g/m²)

CHARACTERISTICS:

- the mattress cover will create a pleasantly airy and healthy sleeping climate in your bed;
- by using it, you will increase the comfort of your old mattress, extend its service life and protect it from unpleasant smell of perspiration;
- you can also use it to improve the comfort of a bed with two separate mattresses;
- the mattress cover is held in place by elastics. If it gets dirty, you can wash it;
- the clever quilting ensures that the padding stays in place and keeps the mattress comfortably snug.

BAMBOO MEDIUM MINI PILLOW

Soft children's pillow made of gentle bamboo fibers

COMPOSITION:

Fabric:

50% bamboo (viscose), 50% cotton

Filling:

100% cotton (600 g/m²)

CHARACTERISTICS:

- bamboo fibres have very special features: they are antibacterial, skin friendly, airy and thus excellently complement the beneficent effects of cotton in the filling;
- bamboo fibers are hydrophilic and effectively drain moisture into the room;
- the pillow creates a wonderful sleeping climate that will ensure your child a calm sleep;
- due to its high-quality composition and thought-out shape, the pillow is suitable for very small children.

CHARACTERISTICS:

- bamboo fibers have very special properties: they are hypoallergenic, skin-friendly and very breathable;
- bamboo fibers do not overheat the body, as they have hydrophilic properties and efficiently wick away body moisture;
- bamboo fibers perfectly complement the beneficial effects of cotton;
- the quilt will ensure carefree rest for the child without night sweats.

MAINTENANCE OF NATURAL PRODUCTS

- **Shake and ventilate** the products regularly so that moisture evaporates. You will thus retain its freshness, thermal characteristics and prevent the intrusion of dust mites.
- Wash the products using the progame for wool, at the lowest possible spin speed or **at a maximum of 400 RPM!** The use of liquid wool detergents or mild natural detergents for delicate laundry is recommended as well.
- After washing, dry the products **on a flat surface**. Do not dry it directly in the sun or in a dryer.
- In the process of washing organic cotton fabric will naturally **became lighter in colour**.
- Since organic cotton fabric is not treated with harmful chemicals, it is expected that **it will became wrinkled**, but with use the appearance will improve again.
- The completely natural cotton filling consists also of cotton seeds that **may tint the fabric** after first washing. In order to remove any coloration, we recommend washing the products again immediately after the first washing, before drying.
- Natural fillings **may have a natural scent**, which will subside after the product will be taken out of packaging. We also recommend to ventilate it on fresh air before its first use, but hang it in the shade.

ODEJA - QUILTED EXCELLENCE SINCE 1932

Odeja is a renowned manufacturer of products for furnishing homes and buildings. We develop and manufacture textile products like quilts, pillows, bed linens, upper mattresses, and other accessories. Odeja products create a high standard of living, as they are distinguished by certified materials and state-of-the-art innovative manufacturing.
